SUMMARY

Fullstack Developer and DevOps Engineer with 7+ years of experience in automation, CI/CD, and system integration.

Proficient in designing internal tools and improving infrastructure reliability using Docker, Jenkins, Ansible, and React.

Skilled in mentoring, architecture design, and team collaboration.

Seeking growth into a technical leadership or team lead role.

EXPERIENCE

Fullstack Developer

05/2022 - Present

[Sberbank](#)

Moscow, Russia

Sberbank — one of the largest financial institutions in Eastern Europe.

- Developed internal automation tools using React and Django
- Built and supported CD pipelines with Docker, Ansible, Jenkins (Groovy DSL)
- Reduced support workload by 12,000+ hours annually via automation
- Mentored junior engineers and conducted code reviews
- Improved CI/CD architecture stability and scalability

DevOps Engineer

11/2020 - 05/2022

[SberTech](#)

Rostov, Russia

SberTech — technology division of Sberbank, responsible for infrastructure and software solutions.

- Maintained CI environments and assisted dev teams
- Automated deployments using Ansible and Jenkins
- Supported OpenShift microservice infrastructure

KEY ACHIEVEMENTS

Operational Automation

Reduced manual support workload by 4,000+ hours quarterly through custom automation tools

Jira Integration

Developed a plugin to connect Jira with Naumen, streamlining contract management

Script Automation Lead

Led development of Day 0 and Day 2 automation scripts to streamline infrastructure provisioning and maintenance

Tech Stack Growth

Deepened fullstack expertise with React and Django while expanding DevOps skillset
